MEMORANDUM FOR DISTRIBUTION

SUBJECT: Generators in Containerized Kitchens

1. The new 10 kW Advanced Medium Mobile Power Source (AMMPS) generator is not compatible with the Containerized Kitchen (CK). The CK was designed specifically for the 10KW Tactical Quiet Generator (TQG), and extensive modifications to the mechanical room structure, maintenance access doors, exhaust system, cooling air system, and electrical layout would be required before an AMMPS generator could be installed in the CK.
2. Due to the difficulty and cost to adapt the CK to fit the AMMPS, a Modification Work Order (MWO) to allow the AMMPS to be retrofit in existing CKs does not exist. PM Force Sustainment Systems is investigating the issue but there is no near-term solution pending.
3. In the interim, units should retain and maintain the TQG with their CK. Per PM Mobile Electric Power, the TQG will continue to be available and supported until at least 2024.
4. Units that are scheduled for AMMPS fielding should identify their CK associated 10KW TQGs to PM MEP to ensure that only the proper quantity of AMMPS are planned for issue to the unit.

A handwritten signature in black ink, appearing to read "R. Poppenberger", with a long horizontal line extending to the right.
