Field Feeding Equipment
National Stock Numbers

Revision: August 21, 2003

The following is a list of kitchen systems (equipment) used by the military, for field feeding. Item in bold are managed by DSCP. Number in use is Army only. Only end item used by the Marines is the M59 Range Cabinet.

1) **Mobile Kitchen Trailer - (MKT) (5948 in use) 7360-01-313-2238 A12, FLZ**

It is a complete kitchen unit mounted on a trailer chassis that can be towed by a standard 2 1/2-ton or 5-ton truck. Currently, 5 models of the MKT are in use. Two or three are used together to feed a battalion.

**** Note: **The MKT is soon to be replaced by the Containerized Kitchen (CK).** *The CK requirement calls for a rapidly deployable, trailer-mounted, containerized field kitchen capable of supporting up to 500 soldiers. A prototype will be ready in September, 1997. The Army anticipates fielding 1277 ea., of the CK.*

3) Kitchen, Company Level, Field Feeding Enhanced - (KCLFF-E) (2438 in use)
7360-01-200-9828 A12

The KCLFF is an assemblage of equipment that provides the capability of heating and serving Tray Pack rations(t-rations). The kitchen is designed for field preparation of hot meals in support of company size units of Light Infantry Divisions. Water is required to operate the kitchen, as well as gasoline for the M2 burner units and lantern. It is operated by two cooks, and can feed 200 people in a 3 hour time frame. Components of the KCLFF-E:

4) **Modular Field Kitchen (MFK) (323 in use) 7360-01-276-9817 A12**

The MFK is issued to all hospital units except the MASH. Each MFK is designed to support up to 250 personnel, to include staff personnel and patients, with T-Rations. Because the MFK is modular, it can be consolidated with other MFK modules to feed larger units. Basic items of issue for the MFK, are shown on page 10-4 of the Army Field Manual 10-23.

5) **M59 Field Range Outfit and Accessories 7360-00-082-2153 S9I**

NSN's 7360-00-082-2153 and 7360-00-702-1719 will no longer be provided they will be replaced by the M59A. DSCP will continue to provide spare parts support for the M59 as long as demand exists. The M59 field range is portable and can be adapted to many different cooking configurations. One field range outfit may be used to cook for up to 50 people. Each field range comes with pots, pans, and cooking and serving utensils. One accessory outfit is authorized for every one to four ranges. An accessory kit includes tools, fire extinguisher, and maintenance items. The M59 field range can be used to bake, roast, boil, grill and deep-fat fry foods by putting the burner unit in top or bottom position.

5A) M59A Field Range Outfit and Accessories 7360-01-479-0312 S9I

The M59 Range has been redesigned; design changes were incorporated to eliminate the need for government tooling and to simplify manufacturing on modern equipment. The M59A will be fielded in mid 2003. The ranges are the same in form fit and function and the range outfit provides all necessary utensils to for meal preparation. The M59A will be provided without a burner, the customer will have to provide a M2A or MBU depending on their requirements. The field range is portable and can be adapted to many different cooking configurations. One field range outfit may be used to cook for up to 50 people. Each field range comes with pots, pans, and cooking and serving utensils (refer to the utensils listed for the M59). One accessory outfit is authorized for every one to four ranges. An accessory kit includes tools, fire extinguisher, and maintenance items. The M59A field range can be used to bake, roast, boil, grill and deep-fat fry foods by putting the burner unit in the bottom position.

5B) Tray Ration Heating System (TRH) 7310-01-295-7479 S9I

The THR consists of a stainless steel hot-water tank and a multi-fuel, Airtronic Burner that operates from it's own fuel source (5-gallon can). A thermodisc maintains water temperature between 180 F to 200 F (180 F +/-5 F is required for heating tray packs). The TRH will heat 18

tray packs to serving temperature in about 40 minutes. When installed on the HMMWV, the TRH uses vehicular electrical power. If the TRH is not HMMWV-mounted, it can be plugged into any 120 VAC, 60 Hz source.

6) M2 Burner Unit (62,500 in use) 7310-01-113-9172 S9I

The M2 is the heat source for the M59 field range, KCLFF-E, MKT, MFK, CK, and the FSC. This burner unit is being replaced with the Modern Burner Unit (MBU) (see below) that will operate on JP-8 diesel fuel in lieu of gasoline.

Modern Burner Unit	7310-01-507-9310	Quantity	SOS
		1	S9I

Modern Burner Unit, Version 3 (MBU-V3) is the updated version of NSN 7310-01-452-8137. The changes incorporated are to reduce the low temperature output and the noise level of the original MBU. (With parts overpack, without manual)
